

### Can-style Push/Push Pot Detail

### New CTS style Push/Pull Pot Detail

## Standard Hybrid Set Wiring w/Controls Kit #4

- Blender is a no load pot such as Bourns 250 kΩ no load or equivalent
- Middle pot is a master tone, push/push pot for splitting the Bridge pickup
- **DO NOT GROUND** shield on 4-conductor cable, unless you have excessive noise issues – this causes increased capacitance and a loss of high end
